PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing, developing, and deploying scalable web applications across the complete Software Development Life Cycle (SDLC). Well-versed in Agile methodologies, with strong proficiency across frontend and backend technologies including Java, Spring Boot, React.js, and Node.js. Adept at leveraging AI-powered development workflows through effective context engineering — from prompt design to task orchestration — to accelerate development, elevate code quality, and drive productivity without compromising craftsmanship. Skilled in building responsive, API-integrated applications with a sharp focus on clean code, performance, and end-user satisfaction. Guided by a perpetual-learning mindset that extends well beyond engineering — a genuine curiosity to keep growing, absorb new perspectives, and apply that growth meaningfully to everything I take on.

EDUCATION

NSHM Knowledge Campus, Durgapur

Bachelor of Technology in Computer Science & Engineering

Durgapur, West Bengal

July 2026

Core coursework: DSA, Software Engineering, Operating Systems, Computer Networking

CGPA: 7.46/10

Deshbandhu Vidyalaya (Boys)

Higher Secondary (Class XII), Science

Chittaranjan, West Bengal

2022

St. Joseph Convent Senior Secondary School

Matriculation (Class X)

Chittaranjan, West Bengal

2020

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+) C, SQL, TypeScript (basic)

Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap

Backend: Java, Spring Boot, Node.js, Express.js, PostgreSQL, RESTful APIs

Tools & Technologies: AI Tools, Git, GitHub, Vercel

TECHNICAL PROJECTS

CampusConnect - Student Information Management System

[Code](#) | [Live Site](#)

Java, Spring Boot, PostgreSQL, React.js, REST APIs

- Engineered a full-stack CRUD application to streamline student record management, pairing a Spring Boot backend with PostgreSQL for reliable data persistence
- Designed RESTful APIs enabling seamless communication with a responsive React frontend for adding, editing, deleting, and viewing student records
- Implemented global exception handling, input validation, and health-monitoring endpoints to ensure production-grade reliability and robustness

DrishtiAI – Image Dehazing System

Final Year Academic Project

- Contributed to system architecture planning, workflow design, flowcharts, documentation, and final presentation for a research-based computer vision project focused on image dehazing for enhanced visual perception in hazy conditions
- Worked on comparative analysis of classical and deep learning dehazing approaches, including DCP, AOD-Net, FFA-Net, and DehazeFormer, evaluated on RESIDE SOTS and Foggy Driving datasets
- Supported the project's evaluation focus on YOLOv8-based object detection, where the study found that dehazing improved visual clarity but could reduce downstream detection performance in real foggy scenes

Personal Portfolio Website

[Live Site](#)

Next.js, Tailwind CSS, Vercel

- Designed and built a personal portfolio site with Next.js and Tailwind CSS, featuring a distinctive terminal-inspired UI to present projects, skills, and career journey
- Implemented dedicated case study pages for major projects, an interactive skills showcase, and a working contact form to give recruiters structured, credible signal on real project outcomes
- Deployed on Vercel with SEO-optimized metadata and continuous deployment, keeping the live site automatically up to date

CERTIFICATIONS & ACHIEVEMENTS

The Complete Web Development Bootcamp – Udemy: Full-stack training covering HTML, CSS, JavaScript, Node.js, Express, MongoDB, and React

Artificial Intelligence & Generative AI Certifications – IBM: 3 courses (40+ hrs) covering AI, GenAI, machine learning, neural networks, and prompt engineering

Java Spring Framework, Spring Boot, Spring AI – Udemy: Enterprise application development with Spring Boot, REST APIs, microservices, and Spring AI integration

Datacom: Partnering with AI in the Workplace – Forage: Used GenAI tools (ChatGPT/Copilot) for research, debugging, and client-ready technical deliverables

Deloitte Australia Data Analytics – Forage: Built Tableau dashboards and applied Excel for data classification and business insight generation

Journey to Cloud Envisioning Your Solution – IBM: Learned core cloud concepts, architectural principles, and strategies to design effective cloud-based solutions.

Enterprise Security in Practice – IBM: Explored modern enterprise security frameworks, threat management, and practical protection strategies for business environments.

Cybersecurity – IBM: Threat detection, risk management, and network security fundamentals
